this book is a psychoanalytic detective story that takes the reader back to the late 1890 s and to the generally unappreciated yet single most important turning point in the history of psychoanalysis the context is the death of freud s father and the decision freud made to abandon his first reality centered theory of the mind in favor of a theory focused on inner fantasies and needs marshalling a large body of evidence langs views this change of heart as a regressive

paradigm shift driven by unconsciously influential archetypes that were in turn linked to a series of early life traumas in freud s life possibly eight in all several of them preceding freud s birth and all but one outside of freud s conscious awareness the ramifications of these incidents placed freud on a later day precipice from which his fall into equivalents of homicide and suicide were at risk freud shifted focus to save his life langs detective work brings him to new insights into such matters as the psychological archetypes that affect the creation and modifications of paradigms physical and mental a new utilitarian view of the design of the emotion processing mind recognition of the complex unconscious impact of reality and of death related traumas on the human psyche and emotionally charged choices the vast superiority of freud s first paradigm over his second theory of the mind and the unconscious reasons despite its many flaws that freud s second paradigm remains in favor to this very day freud saved his life by shifting course but at the same time he created a theory that must be held partly accountable for the compromised forms of dynamic therapy and broad psychological harm that has followed in its wake using an updated version of freud s first paradigm langs shows us a better way to live and work as a psychotherapist or any other career
